This is an awesome family owned and operated business. You feel like you're in another country walking into this establishment. Mexican music is on, practically everyone inside in Latin American, words are written in Spanish and everything on the menu is something I've never seen before! The menu is mostly in Spanish, but don't worry if your translation is a little rusty. The friendly and welcoming team members will help point you toward the right treat to satisfy your sweet tooth. If you're not sure, just ask – they're really helpful.

### Questions & Answers

**Q:** What is an APK File?

**A:** Just like Windows (PC) systems use an .exe file for installing software, Android does the same. An APK file is the file format used for installing software on the Android operating system.

**Q:** If I install an APK from this website, will I be able to update the app from the Play Store?

**A:** Yes, absolutely. The Play Store installs APKs it downloads from Google's servers, and sideloading from a site like ApkClean.com goes through a very similar process, except you're the one performing the downloading and initiating the installation (sideloading).

As soon as the Play Store finds a version of the app newer than the one you've sideloaded, it will commence an update.

**Q:** Why ApkClean.com can guarantee APK 100% safe?

**A:** Whenever someone wants to download an APK file from ApkClean.com, we'll check the corresponding APK file on Google Play and allow user download it directly (of course, we'll cache it on our server). If the APK file does not exist on Google Play, we'll search it in our cache.

**Q:** What are Android App permissions?

**A:** Apps require access to certain systems within your device. When you install an application, you are notified of all of the permissions required to run that application.
